

Business Challenge 2017

Student finalists

Les Mousquetaires

This team provides building professionals with a site to create hardcopy or digital catalogues that they can then personalize for a professional and detailed finish to help provide their customers with a maximum amount of information.

Lélouane

Renovation work will no longer hold any secrets with the “Mes travaux & moi” (My works & me) app: customers’ expectations are clearly defined, the initial project will be adhered to, or modified, if necessary, administrative procedures simplified and communication increased: all of which will be available anywhere at any time. Create, collaborate and manage are the keywords for this app that will ensure project satisfaction for both trade customers and end customers.

Pilteam

The Pilteam team has created a platform to manage financial exchanges between Building professionals and homeowners in order to ensure 100 percent reliability and avoid any unpleasant surprises for the stakeholders.

Mat’Together

The Mat’Together team has created a community of building professionals in the Paris region in order to maximize worksite and DIY store waste recycling.

Batisur

Batisur has conceived an app developed in partnership with Homly You, which will allow homeowners to approach the work they need to do with complete peace of mind thanks to the various direct communication functions with the workers assigned to their project.

Start-up finalists

Simplébo

Simplébo aims to be the business partner of building professionals by helping them develop and extend their customer base using the Internet: business expertise and support to develop mutual trust.

Les Companions

Les Companions designs robot assistants for the building and construction industry, in particular surface treatment operations – with the initial use being interior painting (sanding and application). Our proposal is to support customers using Saint-Gobain’s existing products and to extend the service offered to customers of Saint-Gobain’s distribution brands.

FORMEE

Each year, 50,000 very small enterprises go bankrupt. In two out of three cases, it is due to a failure to plan cash flow. To help contractors scale up their management expertise and to assist them at the day-to-day level, we have developed FORMEE, an automated financial coaching platform.

Automatically, and without having to enter any figures, the contractor has access to optimum dashboards and cash forecasts, enabling them to plan for their future cash requirements. If necessary, FORMEE directs the contractor to financing solutions.

90TECH

SOLITECH is a web and mobile app designed for building and construction contractors to save them time and money. This flexible app adapts to pre-, during- and post-worksites processes.

GENIAXES

selfAdom is a digital self-assessment app, enabling homeowners to evaluate the safety and comfort of their home. It then suggests concrete improvement solutions together with potential contacts with relevant building professionals.
