

SAINT-GOBAIN SIGNS A NEW MAJOR RENEWABLE ELECTRICITY SUPPLY AGREEMENT IN NORTH AMERICA

Saint-Gobain has signed a 15-year renewable electricity supply agreement (Power Purchase Agreement or PPA) with TotalEnergies for the purchase of solar power for its 125 industrial sites in North America (United States and Canada).

This 100 MW PPA, known as the Danish Fields Solar Project (Danish Fields), is expected to offset Saint-Gobain's North American CO₂ emissions from electricity (scope 2 emissions) by 90,000 Metric Tons per year. The project is expected to come online by the end of 2024.

Commenting on this agreement, Mark Rayfield, CEO of Saint-Gobain North America, said: *"With this agreement, Saint-Gobain North America will further reduce its CO₂ emissions, demonstrating how fast the manufacturing industry can transform when long term solutions are at hand. This renewable energy project is a new milestone on the way to meeting Saint-Gobain's commitment to reduce scope 1 and 2 CO₂ emissions by 33% by 2030 - compared to 2017 - and to reach carbon neutrality by 2050."*

Danish Fields (Texas) is the third PPA signed in North America by Saint-Gobain. The [first PPA](#), with the Blooming Grove Wind Farm in Illinois, was signed in 2021, and [the second](#), with Cottonwood Bayou Solar Project in Texas, was signed in 2022. **The three projects combined are expected to represent a reduction of more than 70% in Saint-Gobain North America's scope 2 emissions, compared to 2017 levels.**

ABOUT SAINT-GOBAIN

Worldwide leader in light and sustainable construction, Saint-Gobain designs, manufactures and distributes materials and services for the construction and industrial markets. Its integrated solutions for the renovation of public and private buildings, light construction and the decarbonization of construction and industry are developed through a continuous innovation process and provide sustainability and performance. The Group's commitment is guided by its purpose, "MAKING THE WORLD A BETTER HOME".

€51.2 billion in sales in 2022

168,000 employees, locations in 75 countries

Committed to achieving Carbon Neutrality by 2050
