

Second Prospectus Supplement dated 24 March 2026 to the Base Prospectus dated 3 July 2025.

COMPAGNIE DE SAINT-GOBAIN

(incorporated in the Republic of France)

EUR 20,000,000,000

MEDIUM TERM NOTE PROGRAMME

This prospectus supplement (the “**Second Prospectus Supplement**”) is supplemental to, and should be read in conjunction with, the Base Prospectus dated 3 July 2025 on which the *Autorité des Marchés Financiers* (the “**AMF**”) has granted a visa no. 25-264 on 3 July 2025 and the first prospectus supplement to it dated 8 August 2025 on which the AMF has granted a visa no.25-339 on 8 August 2025 (together with the Second Prospectus Supplement, the “**Base Prospectus**”) and constitutes a prospectus supplement for the purposes of Article 23 of Regulation (EU) 2017/1129 (the “**Prospectus Regulation**”).

This Second Prospectus Supplement has been prepared for the purposes of:

- (i) incorporating by reference the *Document d’Enregistrement Universel 2025* in the French language of the Issuer; and
- (ii) updating the sections “*Risk Factors*”, “*Description of the Issuer’s sustainability strategy*”, “*Information about the Issuer*” and “*General Information*” to reflect the information contained in the Universal Registration Document 2025.

This Second Prospectus Supplement constitutes a supplement to, and should be read in conjunction with, the Base Prospectus. Except where the context otherwise requires, the terms defined in the Base Prospectus have the same meaning when used in this Second Prospectus Supplement.

This Second Prospectus Supplement has been approved by the AMF in France as the competent authority under the Prospectus Regulation. The AMF only approves this Second Prospectus Supplement as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation. Such approval shall not be considered as an endorsement of the Issuer or the quality of the Notes that are the subject of the Base Prospectus as supplemented by this Second Prospectus Supplement. Investors should make their own assessment of the opportunity to invest in such Notes.

To the extent that there is any inconsistency between (a) any statement in this Second Prospectus Supplement and (b) any other statement in the Base Prospectus, the statement in this Second Prospectus Supplement will prevail. Except as disclosed in this Second Prospectus Supplement, there has been no other significant new factor, material mistake or material inaccuracy relating to information included in the Base Prospectus since the publication of the Base Prospectus.

Copies of this Second Prospectus Supplement will be available on the website of the Issuer (<https://www.saint-gobain.com/fr/finance/financements-obligataires>) and/or on the website of the AMF (<http://www.amf-france.org>).

UPDATE TO THE RISK FACTORS

The paragraph entitled “*Risk factors relating to the Issuer*” in the section “*Risk Factors*” appearing on pages 22 to 25 of the Base Prospectus is deleted in its entirety and replaced with the following:

“**Risk factors relating to the Issuer**”

Risks relating to the Issuer are described on pages 290 to 300 of the Universal Registration Document 2025, as defined and further described under “*Documents Incorporated by Reference*” in the Base Prospectus and include risks described in this section.

Concerning the financial risks, the Group is exposed to financial risks, and notably a liquidity risk on financing. In particular, in a crisis environment, the Group might be unable to raise the financing or refinancing needed to cover its investment plans on the credit or capital markets, or to obtain such financing or refinancing on acceptable terms.

For more information on the liquidity risk and the other financial risks to which the Group is exposed, please see note 10.1 to the consolidated financial statements for the fiscal year ended 31 December 2025, presented in Chapter 7 of the Universal Registration Document 2025 and reproduced below:

“**10.1 Financial risks**”

10.1.1 Liquidity risk

Liquidity risk on financing

In a crisis environment, the Group might be unable to raise the financing or refinancing needed to cover its investment plans on the credit or capital markets, or to obtain such financing or refinancing on acceptable terms.

The Group's overall exposure to liquidity risk on its net debt is managed by the Treasury and Financing Department of Compagnie de Saint-Gobain, the Group's parent company. The subsidiaries enter into short- or long-term financing arrangements as a priority with Compagnie de Saint-Gobain or with the regional cash pools.

The Group's policy is to ensure that the Group's financing will be rolled over at maturity and to optimize borrowing costs. Long-term debt therefore systematically represents a high percentage of overall debt. At the same time, the maturity schedules of long-term debt are set in such a way that replacement capital market issues are spread over time.

The Group's main source of long-term financing is constituted by bonds, which are generally issued under the Medium Term Notes program. The Group also uses lease financing, perpetual bonds, participating securities, a long-term securitization program and bank borrowings.

Short-term debt is composed of borrowings under Negotiable European Commercial Paper (NEU CP) programs, and occasionally Euro Commercial Paper and US Commercial Paper programs, but also includes receivables securitization programs and bank financing.

The Group also has various factoring and reverse factoring programs.

Compagnie de Saint-Gobain's liquidity position is secured by a confirmed syndicated line of credit.

A breakdown of long- and short-term debt by type and maturity is provided in Note 10.3, which also details the main characteristics of the Group's financing programs and confirmed credit lines.

Saint-Gobain's long-term debt issues have been rated BBB+ with a stable outlook by Standard & Poor's since April 24, 2023, and Baa1 with a stable outlook by Moody's since June 15, 2022.

There is no guarantee that the Company will be in a position to maintain its credit risk ratings at current levels. Any deterioration in the Group's credit risk rating could limit its capacity to raise funds and could lead to higher rates of interest on future borrowings.

Liquidity risk on investments

Short-term investments consist of bank deposits and mutual fund units. To reduce liquidity and high volatility risks, the Group invests in money market funds and/or bonds whenever possible. These investments are classified as cash at bank, cash equivalents and other liquid assets.

10.1.2 Financial counterparty credit risk

The Group is exposed to the risk of default by the financial institutions that manage its cash or other financial instruments, since such default could lead to losses for the Group.

The Group limits its exposure to risk of default by its counterparties by dealing solely with reputable financial institutions and regularly monitoring their credit ratings. However, the credit quality of a financial counterparty can change rapidly, and a high credit rating cannot eliminate the risk of a rapid deterioration of its financial position. As a result, the Group's policy in relation to the selection and monitoring of its counterparties is unable to entirely eliminate exposure to a risk of default.

To limit Compagnie de Saint-Gobain's exposure to counterparty credit risk, the Treasury and Financing

Department deals primarily with counterparties with a long-term rating of A- or above from Standard & Poor's or A3 or above from Moody's. Concentrations of credit risk are also closely monitored to ensure that they remain at reasonable levels, taking into account the relative CDS ("Credit Default Swap") level of each counterparty.

10.1.3 Market risks

Energy and commodity risk

The Group is exposed to changes in the price of the energy it consumes and the raw materials used in its activities. Its energy and commodity hedging programs may be insufficient to protect the Group against significant or unforeseen price swings that could result from the prevailing financial and economic environment.

The Group may limit its exposure to energy price fluctuations by using swaps and options to hedge part of its fuel oil, natural gas and electricity purchases. The swaps and options are mainly contracted in the functional currency of the entities concerned. Hedges of fuel oil, gas and electricity purchases are contracted in accordance with the Group's purchasing policy.

These hedges (excluding fixed-price purchases negotiated directly with suppliers by the Purchasing Department) are generally arranged by the Group Treasury and Financing Department (or with regional treasury departments) in accordance with instructions received from the Purchasing Department.

From time to time, and in accordance with the same principles as those outlined above for energy, the Group may enter into contracts to hedge purchases of certain commodities or engage in the CO₂ emissions market with spot or forward purchases.

Note 10.4 provides a breakdown of instruments used to hedge energy and commodity risks.

Interest rate risk

The Group's overall exposure to interest rate risk on consolidated debt is managed by the Treasury and Financing Department of Compagnie de Saint-Gobain.

The Group's policy is aimed at fixing and optimizing its medium-term borrowing costs by hedging interest rate risk. According to Group policy, the derivative financial instruments used to hedge interest rate risk can include interest rate swaps, cross-currency swaps, options – including caps, floors and swaptions – and forward rate agreements.

The table below shows the sensitivity at December 31, 2025 of pre-tax income and pre-tax equity to fluctuations in the interest rate on the Group's net debt after hedging:

<i>(in EUR million)</i>	Impact on pre-tax income	Impact on pre-tax equity
Interest rate increase of 50 basis points	32	3
Interest rate decrease of 50 basis points	(32)	(3)

Note 10.4 provides a breakdown of instruments used to hedge interest rate risk and of gross debt by type of interest (fixed or variable) after hedging.

Foreign exchange risk

The currency hedging policies described below could be insufficient to protect the Group against unexpected or sharper than expected fluctuations in exchange rates resulting from economic and financial market conditions.

Foreign exchange risks are managed by hedging virtually all transactions entered into by Group entities in currencies other than the functional currency of the particular entity. Compagnie de Saint-Gobain and its subsidiaries may use forward contracts and options to hedge exposures arising from current and forecast transactions.

The subsidiaries generally set up contracts through the Group's parent company, Compagnie de Saint-Gobain, which then carries out the corresponding forex hedging transactions on their behalf, or through the regional cash pools. Failing this, contracts are taken out with one of the subsidiary's banks.

Most forward contracts have short maturities of less than one year. However, forward contracts taken out to hedge firm orders may have longer terms.

The Group monitors its exposure to foreign exchange risk using a monthly reporting system that captures the foreign exchange positions taken by its subsidiaries. At December 31, 2025, 94% of the Group's foreign exchange exposure was hedged.

The residual net foreign exchange exposure of subsidiaries for the currencies presented below was as follows at December 31, 2025:

<i>(in EUR millions equivalent)</i>	Long	Short
EUR	11	20
USD	20	32
Other currencies	1	6
TOTAL	32	58

The table below gives an analysis, as of December 31, 2025, of the sensitivity of the Group's pre-tax income to a 10% increase in the exchange rates of the following currencies given the subsidiaries' residual net foreign exchange exposure:

Currency of exposure	Impact on pre-tax income
<i>(in millions of euro equivalent)</i>	
EUR	(0.9)
USD	(1.2)
Other currencies	(0.5)
TOTAL	(2.6)

Assuming that all other variables remained unchanged, a 10% fall in the exchange rates for these currencies at December 31, 2025 would have the opposite impact.

Note 10.4 provides a breakdown of instruments used to hedge foreign exchange risk.

Saint-Gobain share price risk

The Group could be exposed to changes in the Saint-Gobain share price as a result of its performance unit incentive plans. To reduce its exposure to fluctuations in the share price, the Group may use hedging instruments such as equity swaps.

As a result, if the price of the Saint-Gobain share changes, any changes in the expense recorded in the income statement would be fully offset by the hedges in place.

Note 10.4 provides a breakdown of instruments used to hedge share price risk.”

UPDATE TO THE DOCUMENTS INCORPORATED BY REFERENCE

The section “*Documents incorporated by reference*” starting on page 41 of the Base Prospectus is deleted in its entirety and replaced with the following:
