

WEBERFLOOR PUMP TRUCK SERVICE

On site pumping and mixing for the preparation of high quality screeds

SUSTAINABILITY

BETTER FOR PEOPLE

- Self-sufficient construction site supply
- Low exposure to dust, vibrations and noise
- Better working conditions for the workers

BETTER FOR THE PLANET

For a typical job site where floor screeds would be delivered in 20kg bags:

- 130 tons of additional CO₂ emissions would be emitted
- 161 tons of packaging material would be used

- No empty packaging waste management on site

PERFORMANCE

BETTER ECONOMIC VALUE

- Noticeable cost and time savings
- Less space requirement to operate pumptruck in comparison to bags storage

- Positive productivity impact

BETTER QUALITY

- Improved performances
