

GLASROC® X

Boards for external applications
ideal for hard weather conditions

SUSTAINABILITY

BETTER FOR PEOPLE

- Moisture resistant/airtightness performance (water absorption rate 5%)
- Thermal conductivity (K) = 0,19 and better performance when incorporated into facade solutions
- Acoustic performance

- Easy to cut
- Easy to fix, handle and install
- At system level, lighter than concrete for transport

BETTER FOR THE PLANET

- Local production
- Incorporable into enhanced performance system solutions

- Resistant to external weather conditions
- UV resistant properties

PERFORMANCE

BETTER ECONOMIC VALUE

- Time saving on jobsite execution: specific tools needed

BETTER QUALITY

- Fire resistant
