

## **Competition law investigations in additives and admixtures**

Competition law investigations have been announced in relation to the supply of chemical additives for cement and chemical admixtures for concrete and mortar in the European Union, the United Kingdom and Turkey. **The Group is aware of and cooperating with these investigations.**

Saint-Gobain recently reinforced its presence in this sector through acquisitions.

Saint-Gobain can confirm that inspections have taken place at its Construction Chemicals business unit site in Turkey.

**Compliance with competition laws in all its businesses is key for Saint-Gobain.** The Group applies a **zero-tolerance policy** and has robust mechanisms in place to ensure compliance, including trainings and internal audits, which were duly applied to the newly acquired businesses.

**Saint-Gobain's Construction Chemicals business unit is and has always been fully committed to competition law compliance and is cooperating with the investigations.**

**At this stage we see no reason to believe there will be a financial impact for Saint-Gobain.** We will not make any further comments.
