

SCORE is a robust and innovative tool to assess the sustainability performance of our construction products.

## WHY DO WE NEED SCORE?

Because, when choosing a supplier, our **top 3** client expectations are...

## WHAT IS A SUSTAINABLE PRODUCT?

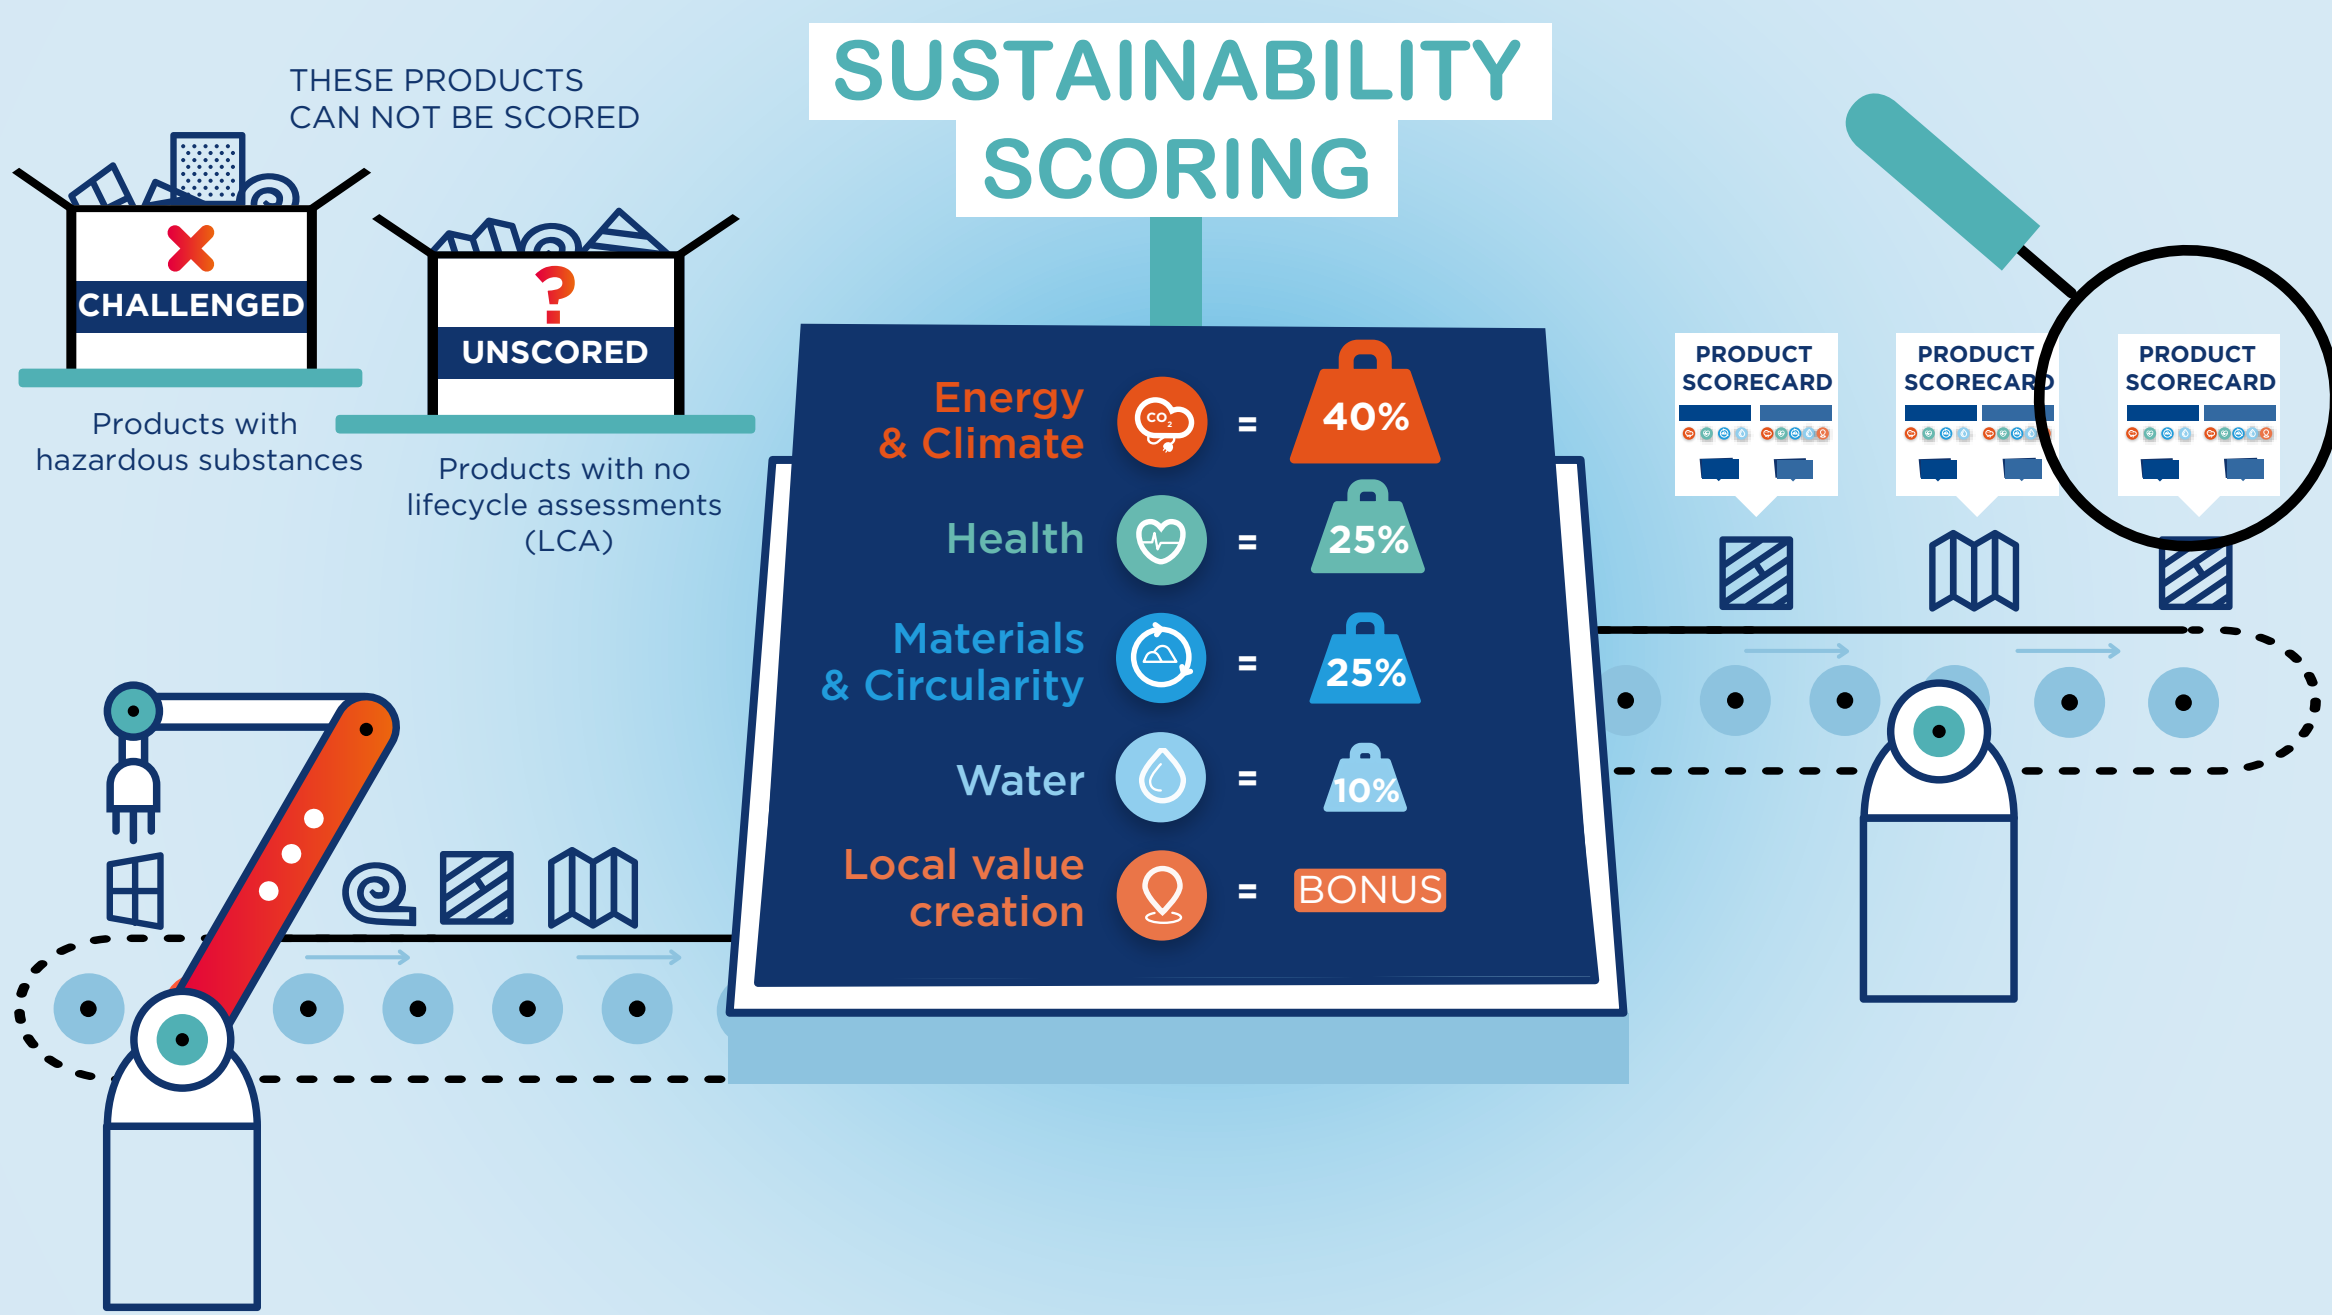

### Multicriteria

- Energy & Climate
- Health
- Materials & Circularity
- Water
- Local value creation

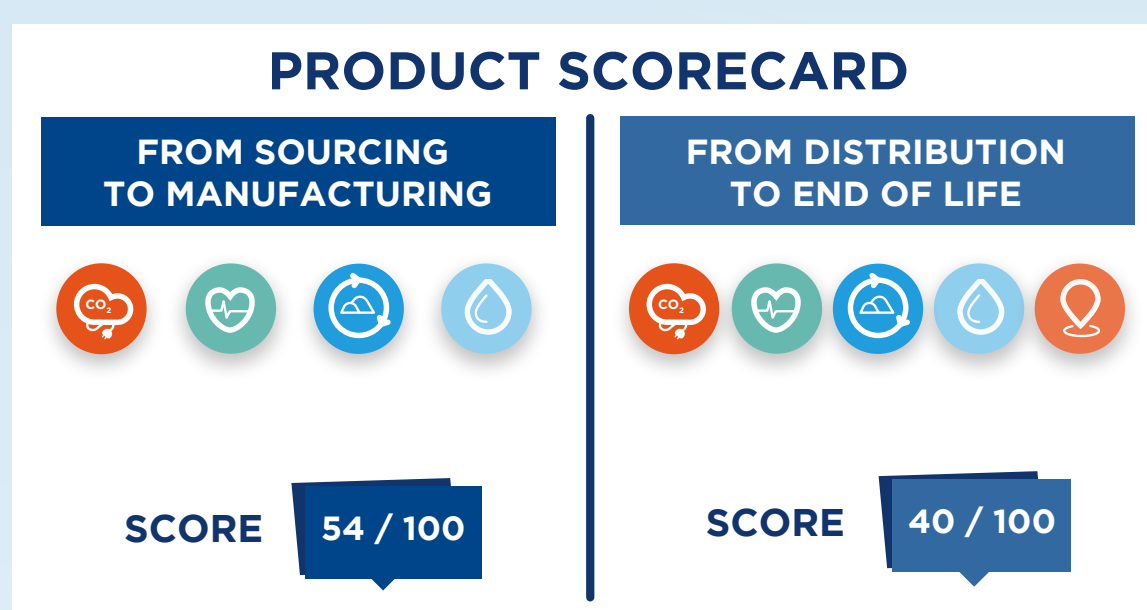

## HOW DO WE SCORE A PRODUCT?

Using the new Saint-Gobain methodology based on **5 weighted categories** and **21 indicators** that reflect key sustainability challenges of the construction market

## HOW CAN WE USE SCORE AT PRODUCT LEVEL?

Thanks to a product Scorecard, innovation teams will now have a synthetic view of a product's sustainability performance boosting **Eco-Innovation** !

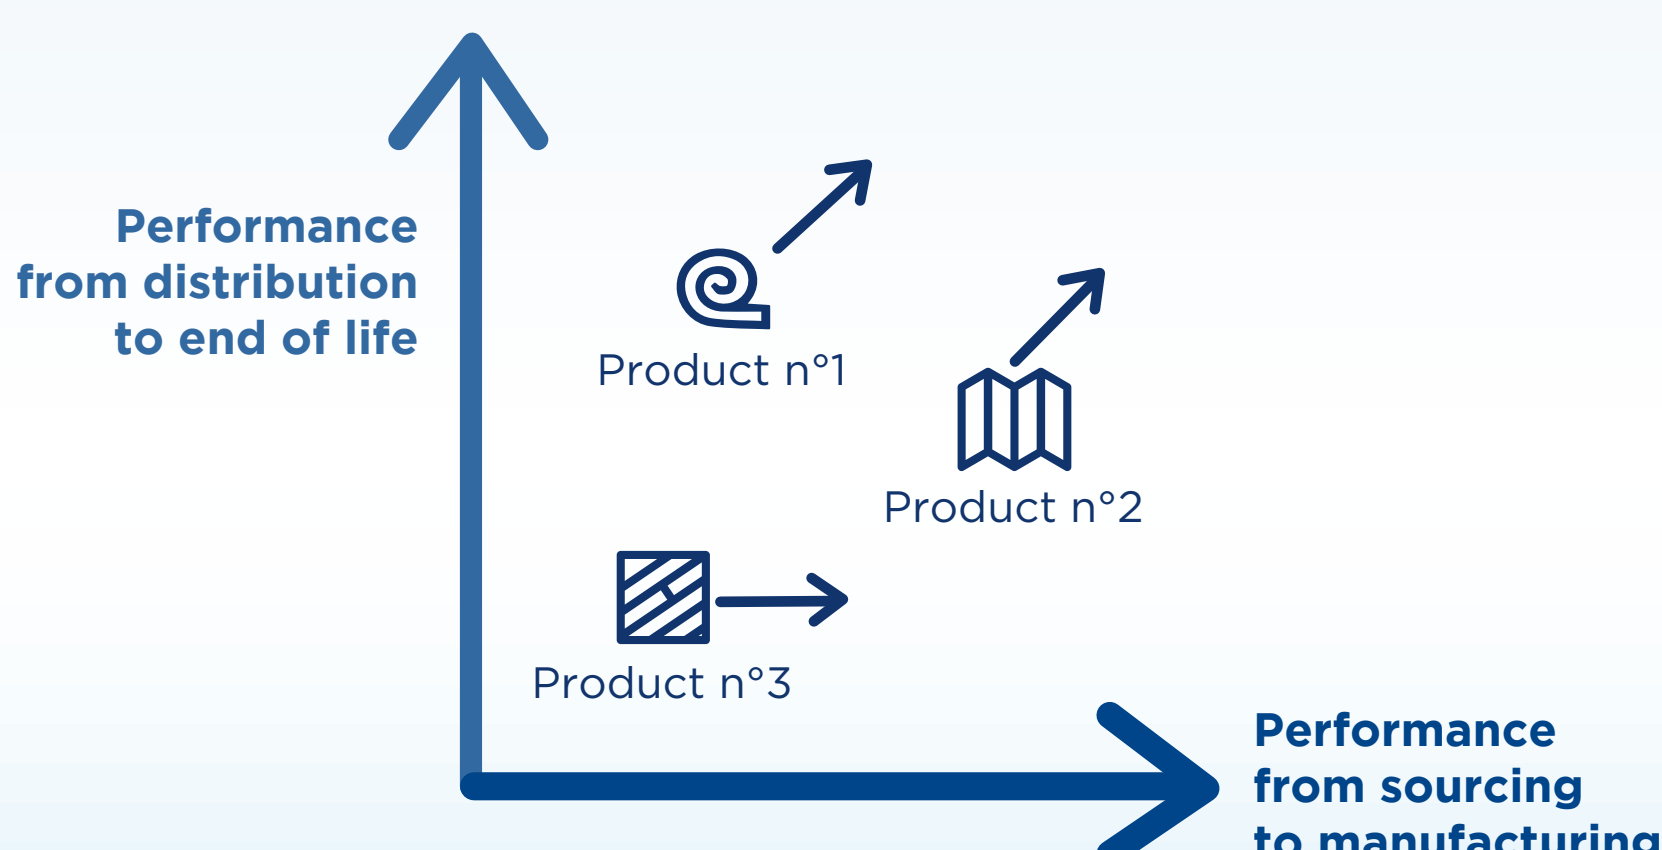

**IDEAS FOR ECO-INNOVATION**

One score (from 0 -100) to evaluate the product's Sustainability Performance from **Sourcing to Manufacturing**, and another score (from 0-100) to evaluate the product's Sustainability Performance from **Distribution to the End of Life**. The better the performance, i.e. **reduced environmental and health impacts and increased sustainability benefits**, the higher the scores.

## HOW CAN WE USE SCORE AT PORTFOLIO LEVEL?

Thanks to a Matrix that can help our teams manage the sustainability performance of their portfolio(s)!

## SCORE

**SAINT-GOBAIN'S ROBUST METHODOLOGY AND TOOL TO ASSESS THE SUSTAINABILITY OF OUR CONSTRUCTION PRODUCT PORTFOLIO... PUTTING SUSTAINABILITY AT THE CORE OF OUR BUSINESS**
